

Remade With Hope announce the launch of their Charity
'Rebuild With Hope Foundation'

For the past 4 years Remade With Hope have been running industrial workshops inside prisons working with offenders to improve self esteem and personal responsibility through the routine of purposeful activity as well as enhancing their post-release employability by learning new skills. The outcomes have been very successful.

The Foundation will build upon the rehabilitation work done by Remade With Hope and will focus on supporting men and women 'Through-the-Gate' once released from prison.

The Foundation aims to establish a Warehouse and Logistics Academy allied to a retail business and will provide direct employment and access to accommodation to newly released ex-offenders as well as providing further skills training and education courses.

We are assisted in this by Cidon Construction who have been employing Remade With Hope offenders on temporary license as well as upon release over the past 2 years. The Foundation will work closely with Cidon to access employment within the broader construction industry.

Supporting ex-offenders to build a new life post-release, benefits the individual and the wider community in helping to reduce both re-offending and the victims of crime.
